

Albatross Task Force in Chile

July 2018

The Albatross Task Force in Chile will be updating the Agreement for the Conservation of Albatrosses and Petrels (ACAP) "[Seabird Bycatch Identification Guide](#)" - a key tool for reinforcing species identification among fisheries observers working onboard vessels.

We are hereby calling for your contributions in the form of pictures of live and dead seabirds for the updated guide. This is of crucial importance, as updated information will help us improve data collection at-sea. Of course, there will be with an emphasis on albatrosses, petrels and shearwaters from ACAP's [species list](#) and the guide will include the explicit recognition of your contributions.

For further information please contact us on twitter [@ATF_Chile](#) or by e-mail biosuazo@gmail.com (Cristián G. Suazo, ATF-Chile).

We look forward to hearing from you soon,

Best wishes, The ATF-Chile team
